### PREAMBLE - INDEPENDENCE FROM GSEAT MANAGER AND GEKO SYSTEMS

HSR CobraLink is an independent SimHub plugin developed by HSR. It is designed to interoperate with the "GSeat Manager" software published by Geko Systems by emitting network packets in the publicly observable Dirt Rally 2.0 UDP telemetry format, which GSeat Manager already accepts as a standard input. HSR CobraLink does not modify, decompile, disassemble, redistribute, or include any portion of GSeat Manager. A separate, valid GSeat Manager license owned by the end user is required to operate the GS-Cobra or GS1 motion seat.

In 2025 and 2026, HSR made good-faith attempts to contact Geko Systems regarding the continued maintenance of GSeat Manager, which has not received updates since 2024 and lacks support for several recent racing simulators that GS-Cobra / GS1 owners rely on. No reply was received within the period preceding the public release of HSR CobraLink. Faced with the prospect of GS-Cobra / GS1 hardware being abandoned by the simulation community for lack of compatible software, HSR chose to develop this interoperability plugin so that existing owners of legitimately purchased hardware can continue to use their motion seats with modern titles. HSR remains open to collaboration with Geko Systems at any time.

HSR is not affiliated with, endorsed by, or sponsored by Geko Systems. "GSeat Manager", "GS-Cobra", and "GS1" are used here purely for descriptive interoperability purposes and remain the property of their respective owners.
